What to Know

SOGI-inclusion is aligned with mandated curriculum and learning outcomes. Clearly identifying these links helps educators protect themselves from pushback.

Doing It Right

Map your lesson to specific curriculum goals and learning outcomes. Save or print the curriculum or learning outcome for backup. Include government or ministry endorsed resources that support your lesson.

Evaluating Success

Increased comfort in teaching SOGI content without fearing objections or barriers. Administrators have something concrete to point to if concerns are raised.

Next Steps

Share curriculum-aligned lesson plans with colleagues. Build a shared folder of vetted resources.
